**About Mineral Mountain and the Holy Terror Project**

Mineral Mountain, through its wholly owned subsidiary Mineral Mountain Resources (SD) Inc., is focused on the exploration and, if warranted, development of its key asset, the Holy Terror Project in the Keystone Mining District in the southeastern part of the Black Hills of South Dakota, USA. The Holy Terror Project is centered along the southwestern extension of the Homestake Gold Trend and covers over 4,000 acres straddling a 300-meter wide gold bearing structural corridor measuring about 15 km along the trend and 1.5 km in width. The Keystone District contains historic, “turn of the century” gold mines, seven of which occur

within the Holy Terror Project. The Bismarck Mine, the Keystone Mine, the Bullion and the Holy Terror Mine occur within the structural corridor over a strike length of about 700 meters and will be the focus of the Phase III drill program. The Holy Terror Project is very well located near Rapid City where it can be easily accessed by a network of roads. Hydro-electricity and modern internet services are on site. As well, the area has a skilled labour force and exploration costs are considerably lower than in Canada. The state of South Dakota has low political risk and is in a jurisdiction that embraces mineral development.
