NEWS RELEASE
No. 2011-04

March 3, 2011

MINERAL MOUNTAIN DRILLS 3.17 g/t OVER 15.0m INCLUDING 9.29 g/t Au OVER 4.05m SHINING TREE GOLD DISTRICT, ONTARIO

Highlights:

- Drilling Continues to Expand Cook Zone in Shining Tree District, Ontario
- DDH GH11-41 intersects **3.17 g/t Au over 15.0m including 9.29 g/t Au over 4.05m and 31.11 g/t Au over 1.05m.**
- Gold mineralization is hosted in a 95 meter wide, strongly altered structure grading 0.739 g/t Au.
- All historical and present drilling has been shallow. The Cook Zone is open in all directions and offers excellent potential to host a commercial gold resource.

Vancouver, British Columbia, March 3, 2011: Mineral Mountain Resources Ltd. (MMV.TSX-V) ("Company") is pleased to report that more positive gold assays have been received from the ongoing drill program which is targeting the **Cook Zone** on Block A, a part of the Company's extensive land package totaling 145 sq. km located in the heart of the emerging Shining Tree gold district. Final assays have been received for an additional 3 drill holes, GH11-39, GH11-40 and GH11-41, all drilled on the same section 10175 E.

The Company acquired the right to earn a 70% interest in Block A by assuming all obligations of an option that Benton Resources Corp. (BTC.TSX-V) had originally signed with Golden Harp Resources Inc. (GHR.TSX-V) (see news release of October 26, 2010 on the Company's website www.mineralmtn.com).

Cook Porphyry Zone

The **Cook Zone** was first discovered in the 1930's and is hosted within silicified and carbonate altered mafic and ultramafic volcanic rocks that have been intruded by alkaline porphyry displaying intermittent brecciation and pervasive alteration associated with strong quartz carbonate veining with pyrite as the main sulphide mineral with up to 5% by volume. This zone, since the 1930's, has been subjected to several shallow diamond drill campaigns which have all intersected significant, wide gold mineralization from several sub-parallel zones near surface.

In December 2010, Mineral Mountain launched a 3500-metre drill program targeting the northwest extension of the Cook Porphyry Zone at about the 150m level below surface. Positive results for the first three holes, GH 10-36, 37 and 38 were announced in the press release dated January 11, 2010.

This release covers the next 3 diamond drill holes GH11-39 (dip -45), GH11-40 (dip -55) and GH11-41(dip -50) all on the same section with an azimuth of 030 degrees.

Nelson Baker commented "We are pleased with the excellent continuity and the significant width of this gold bearing structure which is demonstrating excellent expansion potential particularly to the northwest and down plunge. We have already expanded our proposed drill program to 5500 m up from 3500m and drilling will continue through the break-up period".

QA/QC Program

Mineral Mountain has implemented a quality assurance/quality control (QA/QC) procedures for all of the Shining Tree Gold Project drill programs the details were describe in our first news release dated Jan 11, 2011 and can be found on the Mineral Mountain Resources Ltd website.

The Shining Tree Project is managed by Joerg Kleinboeck P.Geo. and the drill program is supervised by Wally Rayner, P. Geo., the Company's Vice President of Exploration who has verified the contents of this press release and is the Qualified Person for this project.

About Mineral Mountain

Mineral Mountain is a well-funded explorer and developer of precious metals with approximately \$8 million in its treasury. The Company has four major gold projects that meet Mineral Mountain's long term objectives of becoming a strong mid-tier resource group. In south eastern British Columbia, the Company's 100%-owned 89,000-hectare, 70 km by 15 km Kootenay Arc Project is believed to have a geological environment for sediment-hosted precious metal deposits similar to those found in the Carlin Trend of Nevada and in the Selwyn Basin of Yukon. In the emerging Shining Tree mining camp 100 km south of Timmins, Ontario, the Company, through its joint venture with Golden Harp Resources Inc. has become a key explorer in the district. The 145 km² Golden Harp Main Block (60%) and Block A (70%) options host large gold systems that offer above average potential to host both bulk tonnage and high grade gold mineralization. The recently acquired 7 km by 3 km Straw Lake Beach Mine Property 70 km northeast of the Rainy River deposit offers great potential to host a Hemlo-style gold deposit.

**Table 1 Summary of drill results
Mineral Mountain Resources Cook Zone 2011**

Hole #	From (m)	To (m)	Length	Au g/t
GH11-39	153.0	156.0	3.0	0.844

The TSX Venture Exchange has not reviewed and does not accept the responsibility for the adequacy and accuracy of this news release. This release includes certain statements that may be deemed to be “forward-looking statements”. All statements in this release, other than statements of historical facts, that address events or developments that the Company expects to occur, are forward looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words “expects”, “plans”, “could” or “should” occur. Although the Company believes the expectations expressed in such forward looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. Factors that cause the actual results to differ materially from those in forward-looking statements include gold prices, results of exploration and development activities, regulatory changes, defects in title, availability of materials and equipment, timeliness of government approvals, continued availability of capital and financing and general economic, market or business conditions. The Company cautions the foregoing list of important factors is not exhaustive. Investors and others who base themselves on the Company’s forward-looking statements should carefully consider the above factors as well as the uncertainties they represent and the risk they entail. The Company believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct. Please see the public filings of the Company at www.sedar.com for further information.
